00:00:04

Hello, and welcome to the third episode of atoms, molecules and ions.

00:00:13

Previously in atoms, molecules and ions.

00:00:19

We learned to name ionic compounds using the stock system.

00:00:26

And we learned how to determine the formula of an ionic compound.

00:00:35

In today's episode:

00:00:38

We will practice the same skills.

00:00:43

And we will use our discussion board to post questions and answers concerning this assignment.

00:00:57

Here's a copy of the periodic table, which highlights some of the common elements.

00:01:04

Important facts to remember include:

00:01:10

Which metals are monovalent.

00:01:14

And which are their charges,

00:01:18

Or valences, because their name must not have a Roman numeral.

00:01:29

Also, where the nonmetals are.

00:01:31

And what the charges are for each nonmetal.

00:01:41

So, let's get some examples going.

00:01:45

Print the worksheet in canvas and complete it.

00:01:49

Then upload it as a PDF or Word document using the link provided.

00:01:59

Because that's all there is.

00:02:02

There isn't anymore.
